eSupply

Inventory Management Solution

www.sysmex.com/us

Set Your Inventory to Autopilot

eSupply is the innovative reagent inventory management solution for smart labs. Sysmex's eSupply helps your laboratory by automating your inventory ordering processes.

eSupply utilizes predictive learning algorithms to proactively analyze and adjust inventory levels according to your laboratory's reagent usage patterns. It can help drive operational efficiencies across your supply chain by reducing reagent waste and limiting unnecessary shipping costs.

Smart inventory has never been so easy

eSupply automates your inventory ordering to reduce cost, manual documentation and order frequency. With an intuitive interface and easy onboarding, eSupply is efficient, intelligent and simple to use.

SAVE

- **Reduce on-hand inventory**
- **Consolidate and decrease shipping costs**
- **Lower potential costs with fewer redundant urgent or inaccurate orders**

SMART

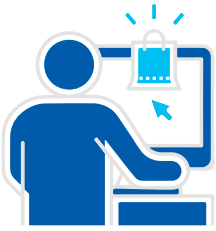
- **Automatically create, notify, manage orders**
- **No more forgetting to place an order**
- **Always have the right reagent in stock**

SIMPLE

- **Intuitive user interface**
- **Easy onboarding**
- **Simple to manage and add users**
- **Accessible resources to manage process**
- **No installation necessary**

Intelligent algorithms make it as easy as 1-2-3

1 ENTER

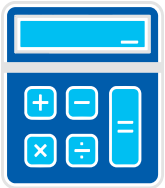


Technologist notices reagent inventory is running low on an analyzer

Reagent is scanned and replaced on the analyzer

eSupply automatically adds the reagent usage to the shopping list

2 REVIEW



eSupply calculates and creates your recommended order

eSupply notifies you that your order is ready to review and approve

Review, adjust if needed and approve your order

3 RECEIVE

Sysmex ships your order

Process repeats approximately every 30 days

Requirements:

- Registered Customer Resource Center (CRC) user
- SNCS Edge Client: SNCS 3.5
- Google Chrome v.81 and higher
- Order reagents directly from Sysmex
- Authority to review, adjust and provide Purchase Order
