XP-300™ AUTOMATED HEMATOLOGY ANALYZER

Robust and Reliable
**XP-300 – ROBUST AND RELIABLE**

**Accurate and reliable**
- Sysmex robustness for the best possible up-time
- Proven technology for accuracy of results
- Linearity to support clinical diagnostics and monitoring
- Sensitive flagging to support diagnosis by the physician

**Innovative technology**
- Performs rapid and accurate analysis of a 17-parameter CBC
  - Including a 3-part WBC differential with an Absolute Neutrophil Count (ANC)
  - Histograms for RBC, WBC and PLT
  - Automatic floating discriminators
- Produces accurate results comparable to other Sysmex hematology analyzers

**Compact and fully integrated**
- Small footprint
- Fits easily on a laboratory bench
- Ideal as a back-up for Sysmex X-Series™ and XN-Series™ analyzers

**Easy operation and maintenance**
- Minimal training required
- Barcoded QC and reagents
- Auto start-up and shut-down

**Safe and secure**
- Non-toxic, biodegradable reagent system
- Two reagents (diluent and lyse) for complete results

**Network capability**
- Data transfer to LIS via LAN (TCP/IP) or Serial Port (RS-232C)
- Bi-directional interface

---

**BEYOND A BETTER BOX™**
Sysmex delivers a comprehensive and intuitive ecosystem that improves performance with next generation diagnostics, advanced tools and technologies, process optimization and BeyondCare™ harmonized support.
