12 Ecological information

- Toxicity
  - Aquatic toxicity: Toxic to aquatic life with long lasting effects.
- Persistence and degradability: No relevant information available.
- Bioaccumulative potential: No relevant information available.
- Mobility in soil: No relevant information available.
- Ecotoxicological effects:
  - Remark:
    - After neutralization a reduction of the harming action may be recognized
    - Inhibition of the development of the biomass
    - Toxic for algae
- Additional ecological information
- General notes:
  - Do not allow product to reach ground water, water course or sewage system.
  - Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.
